

To Whom It May Concern

DORIC Constructions has extensive years of experience and is committed to quality, design and construction within all sectors of the industry. Our innovative and flexible approach to construction has allowed DORIC to achieve efficiencies on projects which have led to savings in construction time and capital costs.

Now recognized as one of the premier construction companies in Australia, DORIC Constructions regularly undertakes major projects with budgets in excess of AU\$120 million.

A great part of our success is our relationships with our sub contractors with whom we have developed close lines of communication and trust to ensure mutual satisfactory project outcomes.

For many years we have had a subcontract relationship with Italseel, who have executed the structural steel components on many of our complex projects.

Structural steel is the structural skeleton of the building which requires the steel to be fabricated and erected to very close tolerances; thereby ensuring following trades have a sound and reliable structure to build upon.

Italseel have provided Doric Constructions with structural steel on a large range of diversified, and in most cases, quite complex projects, delivering structural steel on the due construction date. Italseel have constantly delivered a quality product with exemplary service making Italseel a respected and trusted professional company, one that you can rely upon for delivery.

Doric Constructions present yearly awards to our sub contractors who have performed and delivered outstanding service for the year. In 2007 Italseel was presented with such a prestigious award, being the "Suppliers & Subcontractors Award for Excellent Performance."

Doric Constructions look forward to many more years of strengthening our relationship with Italseel as we know we will continue to receive a professional, quality product, delivered on schedule and within project budgetary constraints.

We wish Italseel all the best for the future. Doric Construction plan to be part of their future.

You're faithfully

JL Martin

General Manager (Doric Construction)
